Female psychology is that of yin, male psychology is that of yang. Men and women compliment one another, with their energies, their efforts, and their strengths. I think 99% of miscommunications in relationships stem from this fact. Men are direct, women are indirect. Men are logical, women are emotional. Men are goal-oriented, women are present-oriented. Men are "yang," whereas women are "yin."

Psychology of women is an approach that focuses on social, economic, and political issues confronting women all throughout their lives. It can be considered a reaction to male-dominated theories such as Sigmund Freud's view of female sexuality. The groundbreaking works of Karen Horney argued that male realities cannot describe female psychology or define their gender because they are not informed by girls' or women's experiences. Theorists therefore claimed this new approach was ...

Terrified of the creepy-crawlies? Scared of slithering serpents? Well, you're not alone. According to the American Psychiatric Association, phobias are the most common psychiatric illness among women and the second most common among men. The National Institute of Mental Health suggests that phobias affect approximately 10% of U.S. adults each year.
