Global political economy is a field of study that deals with the interaction between political and economic forces. At its centre have always been questions of human welfare and how these might be related to state behaviour and corporate interests in different parts of the world. Despite this, major approaches in the field have often focused more on the international system perspective. A side ...

The economy is vastly more unequal, yet economic growth is slower and more chaotic than during the era of managed capitalism. Deregulation has produced not salutary competition, but market concentration. Economic power has resulted in feedback loops of political power, in which elites make rules that bolster further concentration.
